Benefits of Our Window

Our extrusions are fusion welded at every corner to create seamless and strong windows.

Windows that qualify as Most Efficient are windows with the Ultimate² and Ultimate Plus² glass packages. Ask your sales rep for more information.

Maintenance Free

The vinyl formulation maintains its color and smooth surface.

Multi-Chamber Extrusions

Interior walls add strength. These walls and air chambers between further improve insulating properties.

Double Hung

Shown here in Bronze Exterior Laminate (full screen required on painted and laminate windows).

Casement

Sash cranks fold into base for a clean look. Sash opens fully with just a few turns. These windows are triple sealed against the weather and can be safely cleaned inside the home. Hinged side of sash slides away from frame when fully opened.

*FOAM FILL double hung

Gliders • 2+3 Lite

Sash lift out from inside for easy cleaning.
 2 lite - half screen
 3 lite - active panel screen[s]

Awning

Enjoy fresh air even on rainy days.

* Innergy®

- Innergy is the innovative, energy-efficient alternative to aluminum.
- Rigid Thermal Reinforcements are advanced fiberglass reinforced resin inserts, designed to slide easily into window chambers for greater support and insulation.
- Better Thermal Performance
Up to 700 times better than aluminum in material-to-material comparisons.
- Better Thermal Break
Impervious to cold or heat.
- Better protection against condensation
Helps prevent staining that can occur with metal reinforcements.
- Better flexibility
Will not permanently set when impacted.

The name and logo of Deceuninck NV, of its affiliated companies and the products and services manufactured by them, are trademarks protected by national and international laws. RESEARCH & DEVELOPMENT

Polaris products are scrutinized under extreme weather and structural stresses at the Polaris in-factory testing facility. Our R&D Department ensures that our products feature the latest industry innovations. Top quality and integrity are guaranteed.

MORE GLASS OPTIONS Krypton fill, Bronze or Gray tint

ENERGY EFFICIENT GLASS

energySMART® glass is standard in every Polaris® window. These insulated glass (IG) units are panes of glass sealed onto the Intercept® U-shaped steel spacer. Together, the spacer and sealant block temperature transfer and reduce condensation. We also offer many high-performance energySMART upgrades. Low-E coating reduces ultra violet light damage and heat gain. Triple pane IG units have sound deadening properties. Argon or krypton gas fill between panes further reduces temperature transfer. Ask about ENERGY STAR qualified upgrades.
